

MO Drumsticks™ Set-Up Kit (Patent Pending)

CONGRATULATIONS on your decision to GO MO! Find enclosed your Patent Pending Set-Up Kit which includes 1 Single Grooved, 1 Double Grooved drumstick, weighted balls, (a few extras), (2) rolls of black grip tape, clear secure tape attached to each stick and instructions.

We suggest you first play the sticks AS IS on your kit or practice pad with no weights. This not only helps you determine which groove feels the most comfortable (Single or Double) but also helps you compare playing the sticks with and without weights.

Create your Perfect Stick

Start by un-wrapping clear secure tape. **Do not remove the black tape attached to the clear secure tape. The black tape makes it easier to un-wrap and re-wrap the stick.** Now carefully and slowly peel back the clear secure tape and stop when you expose the series of holes 1 to 7, X and/or T (if applicable). **Do not remove the clear secure tape from the stick. This will make it easier to re-apply the tape once you insert the weights.**

Now it's time to weight your sticks. Start by inserting the weighted balls(s) into the stick and secure them in place by re-wrapping the stick with the clear secure tape. To determine if you prefer a front or back loaded stick, insert weighted balls in 1,2,5, X and/or T (front loaded), in one stick and 3,4,7 (back loaded) in the other. Switch sticks from hand to hand and get a feel how each sticks feels in each hand. Once you determine whether you prefer front or back loaded, try adding then removing weights to get a comfortable feel. You can start with adding one ball then add on, or by removing some, it's up to you. The weighted balls might fit a bit snug to avoid falling out, so you may need to tap both sticks together to remove them while trying different combinations. ****While finding your specs, don't use excessive play.** Experiment with different placements of the weights but don't get frustrated searching for perfection. In a few months, you will probably end up owning a few pairs of MOs with different weight and/or groove combinations to suit your various styles of play, so just go with what feels right. You'll know it once you get there.

Once you get comfortable with your choice, it's time to wrap your sticks with the black grip tape. Make sure your weights are inserted per your specs and sticks are wrapped with the clear secure tape. Now snip off the fold of the black tape on one of the grip tape rolls, tape it to the butt end of the stick and wrap your stick, overlapping as you wrap and stopping just before you get to the groove. Now cut the black grip tape and make a few small folds in the black grip tape so you will be able to find the end if you want to un-wrap your stick in the future. Also make a few small folds in the black grip tape you just cut off, for future use. Now repeat for the other stick. **REMINDER... DO NOT WRAP THE BLACK GRIP TAPE TOO TIGHTLY...IT WILL TEAR!** Now get comfortable with your custom balanced sticks with light play and practice.

Order your MO Signature Series or XTreme Sticks

Now it's time to order your Custom Made Sticks. Login to your MO account. From the Store, click "MO Signature Series" or "XTremes". Select your stick preference and all other options. Once you have filled in all fields, click "Add to Cart" and submit payment. Once we receive your information, Mo will confirm your stick specs via email and build your Mo Sticks.
